

THE GOUVERNEUR CHAMBER CORNER

As Seen In The

Gouverneur Tribune Press

November 7, 2018

One of the ways the Chamber reaches out to the community is through its website. This website provides details about Chamber events, features our member businesses and organizations, and provides a community calendar where anyone can add an event. The site links to local resources, municipal sites, and you can even check the local weather!

When the Chamber sponsors an event, like the Pumpkin Fest, Flag Day, the Farmer's Market, Christmas Parade, and so many other events, the website is where you can find the details. The Chamber provides an online Community Calendar as a public service. Anyone can submit an event by clicking the button. Fill in the form. Let people know about your organization's event.

Each month, a Chamber business or organization is featured on a page with photos and information that highlights their business or organization. This Featured Chamber Member page has been updated each month since 2009. Home page ads for those featured, are saved on the website for each year. The Chamber's Business of the Year (This year: New York Pizzeria.) also has a dedicated page on the site.

You can use a search term to locate any Chamber member and their contact information on the Member List page. Search by theme: plumber, pizza, hardware... anything! The whole website can be searched with the site's Google search tool found on each page.

The website is managed by Shari Barnhart's web and tech business, Rainbowtech Designs. Shari is currently on the Chamber Board.
